

Subject Line: Please support Option D to fully fund our school facility needs

Dear Orange County Board of County of Commissioners:

I am a ...

I recently learned that the Orange County Board of County Commissioners is considering putting an education bond on the ballot this November. The bond could raise sufficient capital to upgrade and, in some cases, replace school buildings in the Chapel Hill Carrboro City Schools and the Orange County Schools, giving our children the learning environment they deserve.

You have been given a series of options that include both county commitments and a possible bond that could be placed on the ballot in November 2024. I strongly encourage you to select "Option D," which includes a \$630 million bond. This is a substantial and needed investment in our school buildings, which have been in disrepair for decades.

I understand that option D will likely require a tax increase, but the health and safety of our children should be our highest priority. Please let the voters of Orange County decide whether they want to make a substantial investment in our community's future.

All the best,
